

Mutational testing in the Netherlands

Gerard van Oortmerssen

- Mutational testing is available, cost is covered by insurance for everyone
- 5 expert centers: mutational tests in 82% of all patients
- 50% of patients is not treated in an expert center, but in a general hospital
- Also in these cases mutational testing in 80% of cases
- In general there is information available, most patients are well informed

Advocacy

- Why no mutational testing in 20% of cases?
- Is every patient treated in a hospital with enough experience
- Development of networks of excellence around the 5 expert centers
